↗ ROBOTIZED ISLE

WELDING MACHINES

Automatic welding machine
for wire meshes manufacturing
(fed only by pre-cut wires)

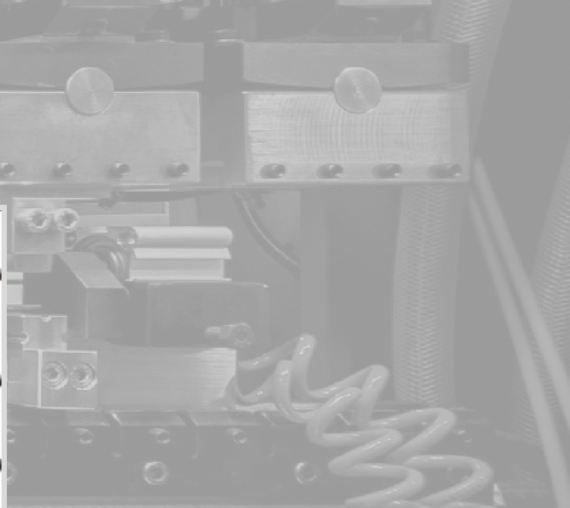

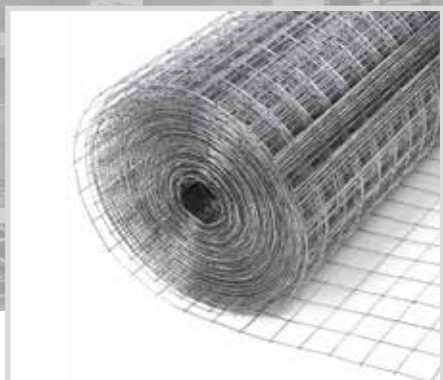

Semiautomatic double table welding machine
for wire shelves manufacturing

Automatic three tables welding machine
for wire shelves manufacturing

Automatic welding machine
for wire meshes manufacturing
(fed by coils/pre-cut wires)

Semiautomatic single table welding machine
for wire shelves manufacturing

Semiautomatic "T" welding machine
for frames reinforcement

WIRE FORMING

Two-dimensional wire forming and welding machine (fed by coil)

Two-dimensional forming and welding machine for wire frames manufacturing (fed by pre-cut wires)

Two-dimensional wire forming and welding machine for rings manufacturing (fed by coil)

Three-dimensional wire forming machine
(fed by coil)

Three-dimensional forming and welding machine
for wire frames manufacturing (fed by pre-cut wires)

Automatic forming machine
for wire hooks manufacturing

AUTOMATIC CUTTING FOR ROUND AND FLAT WIRE

Automatic straightening and cutting machine
for round wire (fed by coil)

Automatic straightening and cutting machine
for square and rectangular wire (fed by coil)

CONSTANT MONITORING

In INDUSTRY 4.0 logic, the launching machines are able to provide all the necessary and relevant information to the production trends as well as to the functionality of the machine itself.

The information collected allows the users to have a clear view of the productivity **available also remotely and from smartphone thanks to the new MyVARO APP:**

Alarm history

Recipe

Production history

ACCESSORIES

PRESS 10/20/25T

Hydraulic folding press

AM 30Q

Motorized wire decoiler

AM 15Q

Motorized wire decoiler

REF 3T

Manual trimming machine

SMU

Chamfering machine

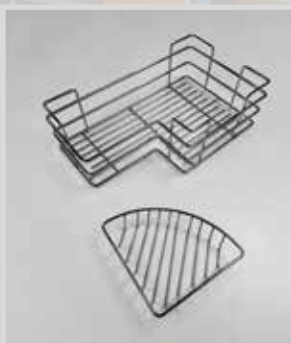

SW PRESS

Hydraulic folding and welding press

SPECIAL LINES & ROBOTIZED ISLE

YOUR RELIABLE PARTNER FOR METAL WIRE

VARO, since 1979, is one of the main European brands for the design and supply of machineries for metal wire processing.

Founded by Mr. Giuseppe Rota, VARO is still a family running company. In these years, VARO has been able to establish itself in international markets thanks to the very high quality and reliability of its machines.

VARO, being born in a linked territory traditionally to the processing and transformation of metal wire, has grown placing the customer at the center of its interest. In virtue of this, VARO earned, in the eyes of the sector operators, the role of reliable and trustworthy partner.

Thanks to the presence of an advanced internal R&D department and a production site equipped with the latest machine tools technologies, VARO is able to study and to supply complex fully automatic industrial plants for wire processing, guaranteeing to the customers maximum adherence to their project needs.
